## About ConSet

ConSet was founded in May, 2000 in a basement in Skjern, Denmark. Our basic philosophy was that ergonomics should not be expensive. We began with the idea to develop and manufacture high quality electric height adjustable desks and to make them affordable so more people could experience the benefits of sit/stand desks. The company has succeeded quite well and now has distribution and subsidiaries throughout the world. ConSet at its core is an engineering company that develops the products down to the smallest component.

Since every component of a ConSet desk is developed and produced by the company including our patented drive system we are able to control our costs and achieve our goal. Since May of 2008 ConSet has made a commitment to the North American and Latin American markets with the formation of ConSet America. Based in Pittsboro North Carolina we maintain strong inventories to support the contract furniture and home office markets as well as other emerging markets. Quality, consistency, value and support is what you will experience with ConSet at every level of our organization.
